ACE CLUB LMS V2 · 28 OCTOBER 2026

Full courses.
Clear learning journeys.

Desktop wireframes · Student recordings, registered live courses and Admin workflows.

Every action and content example is simulated. This pack is design evidence, not a claim of production functionality.

Open decisions: recording watch threshold, simultaneous obligations, completion reversal effects.

Open index.html for the clickable prototype and screen map.

MAKE ROOM TO LEARN

A complete course. Your way to learn.

Build your foundation in Quant, Verbal and DI. Choose the offering and learning route that fit you.

Recordings | Live courses

Learn on your schedule

Browse the outline before purchase. Protected recordings open after payment; this purchase alone does not include a live registration or Meet link.

ALL THREE SUBJECTS

01

Full Course

Quant + Verbal + DI

Sessions, materials, recordings and meaningful pre/post-reads.

Choose any published session in any order.

01 / BEFORE YOU BEGIN

Opened

Before class: Ratios and mixtures

A short introduction to the ideas in this session.

Close reading

SESSION READING / Before the session video

Before class: Ratios and mixtures

A few ideas to carry into the session.

A ratio describes how quantities relate to one another. Before simplifying, express both quantities in the **same unit**.

Think in parts

For every two parts of concentrate, add three parts of water. There are five equal parts in total.

> **Pause and try**
> A 500 ml mixture uses a 2:3 ratio. How much of it is concentrate?

See the worked example ↓

Worked example

Each part is 500 ÷ 5 = 100 ml.

Concentrate is 2 × 100 = **200 ml**.

Sample reading for design review.

SESSION FEEDBACK

A moment to reflect

Give feedback on Quant 4 to reopen the rest of Quant.

Give Quant 4 feedback

QUANT 4 / FEEDBACK

Your feedback is being confirmed.

The form was sent. Keep this session open; there is no need to submit it again.

◌

Waiting for verified confirmation

Other Quant sessions remain locked until the LMS verifies the notification. Your current session, purchased Verbal and DI remain available.

If confirmation is delayed

Check status or contact support. Do not fill the same form repeatedly.

Simulate verified notification | Return to Quant 4 | Check status | Contact support · demo

Access rules still apply

Feedback confirmation does not open unpublished content, unpaid subjects or expired access.

Duplicate notifications must be safe; they do not create duplicate completions.

QUANT 4 / FEEDBACK

Feedback confirmed. Keep going.

Your session completion has been recorded in this simulation.

✓

Quant is open again

All otherwise eligible Quant sessions are available, including previously opened sessions.

One completion across both routes

Returning to this session through live or recordings will reuse the same feedback completion.

Continue learning

Return to Quant 4

Access rules still apply

Feedback confirmation does not open unpublished content, unpaid subjects or expired access.

Duplicate notifications must be safe; they do not create duplicate completions.

Simulate duplicate notification

MY ACCOUNT / COURSE ACCESS

Your access has expired.

Purchase and feedback history remain separate from access eligibility.

Expired

DRAFT · NOT PUBLISHED / Before the session video

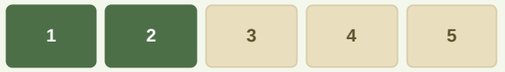

Before class: Ratios and mixtures

A few ideas to carry into the session.

A ratio describes how quantities relate to one another. Before simplifying, express both quantities in the **same unit**.

Think in parts

For every two parts of concentrate, add three parts of water. There are five equal parts in total.

> **Pause and try**
> A 500 ml mixture uses a 2:3 ratio. How much of it is concentrate?

See the worked example ↓

Worked example

Each part is 500 ÷ 5 = 100 ml.

Concentrate is 2 × 100 = **200 ml**.

Sample reading for design review.

Preview render error | View as recordings student | View as live student

Sample reading for design review.

☐ The listed scope and draft content are correct.

Confirm publish | Unpublish shared item | Edit draft

What changes?

Only this content item and the listed placements. The session recording, other readings, live dates and attendance remain separate.

Unpublishing removes this item from the same listed student views. Its draft and audit history are retained.

Publishing an offering exposes its broad outline automatically. This item still uses its own scope confirmation.

All state changes on this screen are in-memory demonstrations.

ADMIN / LIVE CLASSES

Schedule the live class. Keep content independent.

Only actual live events need dates. Each batch has its own schedule.

Course content

Class completion

Class	Recording	Attendance
Scheduled	Published	Self-reported

Confirm the specific class

Quant 4 · 2 November, 6:00 PM IST · November evening batch. Marking it completed enables required feedback for its registered students. It does not claim attendance or publish a recording.

Mark class as completed

Correct accidental completion

A Meet link is not required for class completion.

Independent schedule

BATCH	QUANT 4
November evening	2026-11-02 · 18:00 IST
December morning	7 Dec · 9:00 AM

Both reference the same course session and shared recording. Editing one live date does not move the other.

Registration

Maximum 8 students per live course. No session reservations or waitlist.

Students see their enrolled batch only, subject to active access.

ADMIN / FEEDBACK SUPPORT

Resolve the lock. Preserve the history.

Live classes

See confirmation status without duplicating the full response dashboard.

STUDENT (FICTIONAL)	SESSION	FEEDBACK STATUS	SUBJECT GATE	ACCESS
Demo student A	Quant 4	Waiting for verified notification	Quant locked	Active
Demo student B	Quant 4	Submitted · preserved	Released	Expired · still denied

Manual feedback override

Demo student A · Quant 4 · Quant subject

Only the feedback restriction is affected. Payment, expiry and publication rules remain in force.

Reason · required

Explain the support correction

Confirm this student, session and subject.

Record feedback override

A separate audit entry records Admin, time and reason. Existing submissions are not deleted or relabeled.

Audit & confirmation

Quant 4 feedback submission · Demo student B

Preserved regardless of later corrections

Review responses in Tally · demo

Review completion reversal

Multiple pending obligations and completion-reversal effects need a decision before production implementation.

EXISTING AREA

Mocks stay as they are.

V2 course feedback locks do not change the existing Mocks experience.

Existing Mocks entry point

This wireframe deliberately leaves mock tests, attempts, scoring and review behavior unchanged.

No V2 changes

Return to my course

REVIEW / OPEN CHOICES

Three decisions, clearly separated.

These interactions are shown for review, not silently approved.

01 · OPEN

Recording watched

Feedback is due after watching. The exact player threshold is not selected: **80% or 90%**.

“Simulate recording watched” is a wireframe control, not a final player rule.

02 · OPEN

Simultaneous obligations

How should multiple pending session obligations in one subject be resolved and shown?

The demonstrated lock uses one pending Quant 4 obligation. No precedence or automatic clearing rule is assumed.

03 · OPEN

Completion reversal

Admin correction is approved. The effect of reversal on existing locks still needs a decision.

Preserve submissions and log the reason. This prototype does not invent an automatic unlock or erase feedback.

Already settled

One general feedback form; live completion creates the obligation for registrants; “I didn't attend” is valid completion; subject-wide lock; current session remains open; entitled other subjects remain open; support override is audited; Mocks are unchanged.
